San Francisco Public Works (Public Works), a department of the City and County of San Francisco (City), announces a Request for Proposals (RFP), seeking qualified suppliers (“Proposers”) to provide a trash can sensor monitoring system for City-owned public trash cans. The selected Proposer will supply sensor hardware, provide a Data Management and Monitoring System, and perform related services necessary to deploy, activate, and maintain the system.

The contract resulting from this RFP will have an initial term of 3 years. The City intends to award one (1) contract with an estimated contract amount of \$1,000,000 for the initial term. This amount represents the City’s estimated contract capacity based on the anticipated deployment of sensors, associated software hosting, installation, maintenance, and related services described in this Solicitation. Public Works reserves the right to increase or reduce the contract amount to be awarded, consistent with City requirements and available funding.

The Local Business Enterprise (LBE) subcontracting requirement has been waived by the Contract Monitoring Division (CMD). Additional information regarding CMD requirements is provided in the RFP.
